| Workflow automation and applied AI specialist with 8+ years across digital products, content, operations, and process improvement. Designed architectures using n8n, Make, APIs/webhooks, RAG, Supabase/PostgreSQL, and NocoDB and led native CRM AI adoption, increasing usage by 150%. Experienced in bottleneck mapping, AI-assisted prototyping, LMS, and technical enablement. Uses Python at a practical level for automation and analysis, not as software engineering. Holds a completed Philosophy degree; Electrical/Electronics Engineering is incomplete. Does not claim HeyGen or text-to-video experience. |                                |
