

SALES ENABLEMENT

Kevin Augusto Vieira

Sales Enablement & Go-To-Market Specialist

Curitiba, Brazil | Remote

kevin.aug.vieira@gmail.com | LinkedIn

Professional Summary

Sales Enablement and Go-To-Market specialist with 8+ years of experience in digital marketing, product strategy and commercial execution.

Focused on translating advertising and product strategies into structured sales execution, improving how frontline teams position solutions, conduct customer conversations and drive product adoption.

Experienced in designing scalable enablement programs, playbooks and KPI-driven training systems that improve execution consistency, commercial quality and revenue outcomes.

Core Skills

Sales Enablement • Go-To-Market Execution • Digital Marketing
Product Positioning • Sales Training • Playbooks
Commercial Conversations • Objection Handling • Sales Coaching
Performance Analysis • Funnel Optimization • CRM & Automation
AI Workflows • Data-Driven Decision Making • Stakeholder Management

Experience

Wipro

Global Technology Operation (Meta Project)

Marketing Coordinator / Sales Enablement Expert

Sep 2024 – Present

- Translate digital advertising strategies and product updates into structured sales playbooks, messaging frameworks and training programs
 - Enable frontline teams to position solutions, structure customer conversations and communicate value effectively
 - Deliver training sessions, simulations and coaching based on real customer scenarios and commercial execution
 - Conduct call analysis and performance diagnostics to identify gaps in execution, messaging and customer interaction quality
 - Drive adoption of CRM workflows and AI-assisted sales processes
-

Key Initiative: Next Level Bootcamp

- Designed and implemented a structured Sales Enablement program built with PMO and performance management principles
 - Defined OKRs, KPIs and success metrics to measure training effectiveness, execution quality and development progress [\[Training C...d Call \(1\) | Excel\]](#)
 - Structured the program into phases: strategic planning, learning design, pilot execution and continuous governance [\[Training C...d Call \(1\) | Excel\]](#)
 - Conducted stakeholder alignment, competency mapping and definition of measurable learning objectives [\[Training C...d Call \(1\) | Excel\]](#)
 - Developed training modules covering communication, storytelling, negotiation, consultative selling and execution mindset [\[Training C...d Call \(1\) | Excel\]](#)
 - Created a performance control panel to track participant progress, attendance, knowledge checks and certification readiness [\[Training C...d Call \(1\) | Excel\]](#)
 - Implemented structured tracking of learning progression and behavioral improvement across the training journey [\[Training C...d Call \(1\) | Excel\]](#)
 - Built feedback loops and continuous improvement cycles based on pilot results and participant insights [\[Training C...d Call \(1\) | Excel\]](#)
-

Impact

- Improved consistency in sales conversations and solution positioning through structured training frameworks
 - Increased adoption of products and sales tools through scalable enablement programs
 - Strengthened objection handling and value-based selling across frontline teams
 - Enhanced visibility of performance gaps using structured KPI tracking and diagnostics
 - Transformed training initiatives into data-driven performance improvement systems
-

Co-Founder & Product Lead

Meu Barzin

Dec 2025 – Mar 2026

- Stakeholder Management
- Voice of Customer
- Voice of Sales
- Content Strategy
- Growth Strategy
- Customer Experience

Professional Experience

Wipro Brasil

Marketing Coordinator / Sales Enablement Expert

Global Digital Advertising Project

Sep 2024 to Present

- Translate digital advertising product updates, solution guidelines and commercial priorities into clear value propositions, sales narratives and practical positioning frameworks for frontline teams.
- Build enablement materials that help sales and marketing teams understand how advertising solutions work, how they should be positioned and how they connect to customer business outcomes.
- Support Go To Market execution by transforming strategic product information into playbooks, pitch structures, training content, objection handling materials and customer conversation guides.
- Partner with cross functional teams across product, operations, quality, data and training to align field execution with product priorities and commercial goals.

- Conduct call listening, frontline feedback analysis and performance diagnostics to identify gaps between product strategy, customer needs and sales execution.
- Develop training programs, workshops, bootcamps and simulations based on real customer scenarios, helping teams improve solution positioning, discovery and value based conversations.
- Support adoption of internal CRM, workflow and AI assisted sales tools by creating practical guides, prompts and usage frameworks for customer preparation, follow up and opportunity prioritization.
- Convert frontline insights into structured feedback loops to improve enablement materials, support product adoption and strengthen alignment between strategy and execution.

Selected Impact

- Improved product understanding and sales messaging consistency by translating complex advertising solutions into practical narratives and customer facing frameworks.
- Strengthened solution adoption by creating structured enablement materials, training sessions and hands on activation formats for large scale frontline teams.
- Improved quality of customer conversations by combining product knowledge, commercial guidance, call analysis and structured coaching.
- Supported better opportunity prioritization by helping sellers identify higher potential recommendations and connect them to customer needs.
- Built objection handling programs based on recurring customer resistance patterns and best practices collected from high performing team members.
- Created practical simulations and role play formats to improve commercial reasoning, positioning confidence and solution based selling.
- Helped connect marketing strategy, product adoption and frontline execution through data driven enablement and continuous feedback loops.

Meu Barzin

Co Founder & Product Lead

Dec 2025 to Mar 2026

- Co founded an AI based recommendation product focused on helping users discover bars and experiences based on contextual preferences.
- Designed the product concept, user journey, value proposition and initial business model.
- Structured Ideal Customer Profile, market research, competitor analysis and Go To Market strategy.
- Built the product architecture using AI, WhatsApp based interaction logic and automation workflows.
- Led early validation efforts through user feedback, market analysis and partner conversations.
- Supported B2B partnership development by prospecting potential venues and presenting the product value proposition.
- Managed early branding and organic growth strategy to validate market interest and product positioning.

AK Branding & Web Design

Founder & Digital Strategist

Mar 2019 to Sep 2024

- Founded and managed a boutique digital agency focused on branding, website development, UX, SEO, content strategy and conversion oriented digital experiences.
- Led end to end digital projects for clients, including discovery, positioning, website architecture, visual design, copywriting, SEO and implementation.
- Designed conversion focused landing pages, institutional websites, ecommerce experiences and digital funnels.
- Managed the full commercial cycle, including prospecting, needs assessment, scope definition, pricing, proposal development and client relationship management.
- Created acquisition strategies combining organic traffic, website conversion, content strategy and inbound marketing.
- Translated business needs into digital positioning and customer experience strategies, helping clients improve online visibility and lead generation.

Munzner

Marketing & Growth Specialist

Oct 2018 to Aug 2024

- Led digital marketing and growth initiatives across acquisition, retention, content, CRM, automation and customer relationship strategies.
- Developed and managed marketing funnels using SEO, content marketing, paid media, email marketing and WhatsApp based customer communication.
- Designed and launched a digital education product, including content structure, script writing, copywriting, editing and implementation in an online learning platform.
- Applied facilitation and storytelling methodologies to create high impact content, institutional positioning and paid media narratives.
- Built CRM automation flows and lead nurturing processes through tools, APIs and webhooks to improve conversion and reduce customer journey friction.
- Worked directly with customers to gather qualitative feedback, identify experience gaps and improve growth and product strategies.
- Connected marketing execution with customer success insights to improve retention and overall customer experience.

Product Marketing Highlights

- Translated product complexity into clear messaging, positioning and commercial narratives.
- Connected customer insights, frontline behavior and sales feedback to improve product adoption.
- Built sales enablement materials that supported product understanding, value communication and commercial execution.
- Applied GTM thinking to both corporate product adoption and startup MVP validation.
- Combined marketing strategy, UX, CRM, automation and customer research to support product growth.

Kevin Augusto Vieira

Product Marketing & Go-To-Market Specialist

Curitiba, Brazil | Remote

kevin.aug.vieira@gmail.com | LinkedIn

Professional Summary

Product Marketing & Go-To-Market specialist focused on translating digital marketing and product strategies into real execution.

With 8+ years of experience across digital marketing, advertising solutions and sales enablement, I specialize in turning complex product capabilities into clear value propositions, sales narratives and scalable go-to-market execution.

My work sits at the intersection of product, marketing and sales, helping frontline teams effectively position solutions, improve customer conversations and drive product adoption through structured playbooks, training programs and data-driven feedback loops.

Rather than focusing only on strategy, I focus on making strategy work in practice — connecting messaging, behavior and execution to generate consistent revenue outcomes.

Core Skills

Product Marketing • Go-To-Market Strategy • Value Proposition
Messaging & Positioning • Sales Enablement • Product Adoption
Digital Marketing • Advertising Strategy • Customer Insights
ICP Definition • Sales Playbooks • Commercial Training
Objection Handling • Funnel Analysis • CRM & Automation
AI Workflows • Data-Driven Decision Making

Professional Experience

Marketing Coordinator / Sales Enablement Expert

Wipro | Global Go-To-Market & Advertising Operations (Meta Project)

Sep 2024 – Present

- Translate digital advertising strategies and product updates into positioning frameworks, value propositions and sales narratives
- Build playbooks, messaging structures and training materials to support go-to-market execution and product adoption
- Enable frontline teams to position solutions effectively, structure customer conversations and communicate business value
- Design and deliver training programs, simulations and scenario-based sessions based on real customer interactions
- Conduct call analysis and performance diagnostics to identify gaps in messaging, positioning and execution
- Create structured frameworks for objection handling and value-based selling
- Support adoption of CRM workflows and AI-assisted sales tools through practical guides and prompts
- Partner with product, operations, data and training teams to align strategy with field execution
- Transform frontline insights into feedback loops to improve messaging consistency and adoption

Impact

- Improved product positioning clarity across sales teams through structured messaging frameworks
 - Increased consistency in customer conversations and solution presentation
 - Strengthened product adoption by aligning training, sales execution and real customer scenarios
 - Reduced gaps between product strategy and frontline execution with data-driven enablement
 - Enabled more effective value-based selling through structured playbooks and simulations
-
