GTM systems leader with hands-on experience designing, integrating and scaling CRM, automation and enablement stacks across B2B SaaS, PLG and startup environments. At Wipro (Meta Project) enabled 150+ marketing professionals and made the operation #1 globally in native-AI CRM adoption growth (+150%, 4->10 prompts/day), owning enablement activations, adoption strategy and process documentation. At Meu Barzin built a 0-to-1 go-to-market engine (505 qualified leads, ~200 venues mapped) and architected a RAG conversational agent with zero-hallucination rules. At Munzner and AK Branding delivered automated nurture funnels (10,000+ visits, ~R\$50k high-ticket revenue; +250% lead capture) and inbound/SEO content (~1,000 organic visits, ~10% visitor-to-lead). Fluent in SQL, data models and APIs; ships using agile, UAT, documentation and quality-assurance practices. Honest gap: no Salesforce Sales Cloud / HubSpot / Apex / Make-Zapier production depth in the graph; bring the transferable foundation (CRM, automation, integrations, enablement) and ramp on the platform.

- Provide technical training to the team on Meta internal tools, driving onboarding and replicating training programs on proprietary CRMs and practical native AI implementations.
- Performance Reporting: Partnered with the MIS data team to leverage Power BI and Excel dashboards, translating complex operational data into actionable progress reports and performance reviews for senior leadership.
- AI CRM Ownership, Activation, and Record Adoption: Owned native AI activation and adoption within Meta's proprietary CRM, from onboarding through 3 weeks of hands-on side-by-side coaching. Structured use cases, prompts, workshops, role plays, and frontline best-practice sharing. Increased usage from 4 to 10 prompts/day per consultant (+150%), making the operation #1 globally for adoption growth while improving contextual prompt quality during live calls.
- Next Level Bootcamp Pilot & Ramp-up Reduction: Conceived and led a post-onboarding internal program for 12 Meta Marketing Pros, based on Power BI diagnosis and new-hire feedback about the gap between initial certification and the commercial routine. The pilot reached 100% completion and indicated a reduction in historical ramp-up from about 6 to 3 months (-50%), with 90%+ quality audit scores on initial reviews and 90% consultant CSAT; participants who remained in the operation reached Top Performer performance.
- Agile Governance and Training Squad: Participated in the squad responsible for the enablement program, using daily meetings, OKRs, roadmap, and backlog to organize weekly tasks and prioritize requests from clients, managers, leaders, and internal consultants.
