

Hi BairesDev team,

The Revenue Operations Specialist role combines the areas where I have delivered my strongest results: sales enablement, GTM processes, commercial content, CRM, and applied AI. At Wipro on the Meta Project, I translated global product updates into value propositions, pitches, playbooks, and training for 150+ professionals.

I also led native AI activation in CRM from onboarding through hands-on coaching, increasing usage from 4 to 10 prompts per day per consultant (+150%) and making the operation number one globally for adoption growth. In another program, I reduced new consultant ramp-up from 6 to 3 months while achieving 90%+ quality and 90% satisfaction.

My experience combines copy editing, root-cause analysis, Power BI, Excel, CRM, automation, and global stakeholder collaboration. I would bring this combination to remove friction across the revenue lifecycle and strengthen sales productivity at BairesDev.

Kevin Augusto Vieira
