

Dear Grupo RIC Paraná team,

The opportunity to build Sales Enablement for a multi-platform portfolio directly connects with my experience in commercial training, media, content, and process improvement. At Wipro on the Meta Project, I led Sales Excellence and Sales Productivity pillars, turning product updates into value propositions, pitches, playbooks, and frameworks for 150+ professionals.

I designed and governed a bootcamp that reduced new consultant ramp-up from 6 to 3 months, with 100% completion, 90%+ quality in initial audits, and 90% satisfaction. I also delivered coaching, call listening, root-cause analysis, and CRM and AI training, increasing tool adoption by 150%.

My background includes 40+ marketing and media projects for SMBs, an e-learning launch, and analysis of conversion, revenue, and ROI metrics. My completed degree is in Philosophy rather than one of the specifically listed fields, but my practical experience closely matches the role. Travel availability would need to be confirmed before making any commitment.

Kevin Augusto Vieira
