

Hi Infobip team,

The mission of keeping partners informed, enabled, and ready to turn new products into customer value closely matches my background in enablement and adoption. At Wipro on the Meta Project, I translated global product updates into value propositions, pitches, playbooks, and training for 150+ professionals.

I also designed and governed a bootcamp that reduced ramp-up from 6 to 3 months, with 100% completion and 90%+ quality, and led CRM AI activation that increased usage by 150%. In parallel, I validated value propositions and secured B2B partnerships for a local pilot, using feedback and funnel analysis to identify opportunities and adoption barriers.

I do not claim direct CPaaS experience or formal ownership of a regional partner ecosystem. I do bring a strong, measurable foundation in product communication, enablement, use cases, adoption, and alignment between global teams and local operations that I can apply to Infobip's platform.

Kevin Augusto Vieira
