

Hi Next Level Growth team,

Turning client strategies into clear workflows, on-time deliverables, and measurable results directly matches my marketing operations and project background. At AK Branding, I delivered 40+ projects for SMBs while coordinating concurrent accounts, scopes, budgets, timelines, resources, and communication from kickoff through delivery.

This work covered branding, websites, landing pages, campaigns, content, and automation. A/B testing and UX and chatbot improvements increased lead capture from 8 to 20-30 per month (+250%). At Wipro on the Meta Project, I worked with OKRs, roadmap, backlog, dashboards, and root cause analysis, and led a program that reduced time-to-productivity by 50%.

I have experience with Notion, project tools, Meta, Google Drive, data, and automation. I do not claim GHL or Frame.io experience, but I bring transferable processes and the ability to learn those tools quickly without compromising operational quality. I would apply this combination of organization, analytical judgment, and hands-on execution to create predictable delivery across Next Level Growth's client accounts.

Kevin Augusto Vieira
