

Hello Nuvemshop team,

Building commercial autonomy and high performance through playbooks, practice, and data-informed coaching is central to my recent experience. At Wipro on the Meta Project, I led Sales Excellence and Sales Productivity pillars, translated product updates into pitches, scripts, and frameworks, and enabled 150+ professionals.

I also conducted call listening, structured feedback, and root-cause analysis to turn gaps into improvement plans. I designed the Next Level Bootcamp for 12 consultants, achieving 100% completion, 90%+ quality, 90% satisfaction, and reducing ramp-up from 6 to 3 months. My analytics experience includes partnering with MIS to explore Power BI and Excel and guide decisions.

I have not used Gong in production, and my Spanish is basic, which I state transparently. In return, I bring direct enablement, coaching, onboarding, sales methodology, and global stakeholder experience to support Nuvemshop's revenue engine.
