

Hello XTRATEGUS team,

Helping professionals achieve measurable productivity gains through AI describes work I have already led in practice. At Wipro on the Meta Project, I owned native CRM AI activation from onboarding through three weeks of side-by-side coaching. Usage increased from 4 to 10 prompts per day per consultant (+150%), making the operation #1 globally for adoption growth.

I also built playbooks, scripts, and training assets, delivered enablement, and used root-cause analysis to turn gaps into improvement plans. Through the Next Level Bootcamp, I reduced ramp-up from 6 to 3 months. In product work, I use AI, prompt engineering, n8n, APIs, RAG, and Supabase to create outcome-oriented use cases.

I have not yet worked directly with Microsoft 365 Copilot or Power Platform, but I bring proven corporate AI adoption and the ability to learn and teach new tools quickly. I would apply that experience to XTRATEGUS clients.

Kevin Augusto Vieira
